

2019 ANNUAL REPORT

SUNBURST
projects
Established in 1982

Our Mission

Sunburst Projects promotes health, wellness and social justice through services that strengthen and empower individuals, families and communities to ensure those living with HIV/AIDS reach their highest potential.

Our Core Values

- ♥ We focus on the quality of life and not the disease itself, and strive to ensure that all people living with HIV/AIDS are not subject to discrimination.
- ♥ We believe that as an agency, we are responsible for the health and emotional well-being of our clients, yet the issue is not ours alone; governments, communities and society as a whole must also be held accountable.
- ♥ We practice compassionate listening and non-judgmental communication.
- ♥ We strive to provide services delivered with flexibility, personalized attention and cultural sensitivity.
- ♥ We strive to promote self-sufficiency and empowerment.

program spotlight

“For over 10 years Sunburst Projects has successfully worked with HIV positive pregnant women in our community to ensure that their babies are born healthy and remain HIV negative. In 2019, two HIV positive women with unsafe viral loads were referred to us for medical case management. By actively supporting these women throughout their pregnancies, accompanying them to medical appointments, and helping them with medication adherence strategies, both women developed undetectable viral loads and delivered healthy, HIV negative babies who are thriving. We continue to work closely with these clients and provide ongoing surveillance for the health of both mom and baby.”

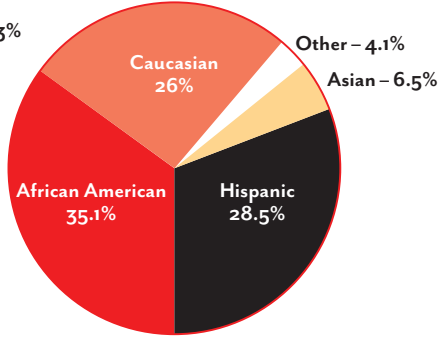

– Diana Pretzlaff, RN/Director of Health Services, Sunburst Projects
